Proposed Change:	Add a new level of CAIS User for Projects module				
Justification:	<p>Our migration to corporate CAIS is eminent, and we would like our planning groups to utilize the projects module within CAIS. It would replace an in-house tool we currently use for a comparable process.</p> <p>They would only need the ability to add/modify/delete projects and select deficiencies, and prevented from modifying any of the underlying "deficiency" data (needs to go through the proper channel).</p>
