Proposed Change:	Add the option of applying the inspection date at Asset Level, to corresponding active IUs inspection date for the asset. This would be accomplished via a check box adjacent to the Inspection Date field on the Asset Detail window.				
Justification:	Currently, there isn't a correlation between the inspection dates. We spend a lot of time analyzing and updating Asset and IU records to synchronize them. We understand that not all IUs for an asset can be inspected at the same interval (especially for OSFs) but an <u>option</u> to apply the dates to all IUs would help us maintain the data.
