Subject: Condition Assessment Information System (CAIS) Version 3.49 Release

Today, Thursday, January 11, 2024, version 3.49 of the Condition Assessment Information System (CAIS) was released. This release addresses the following enhancements.

Change Request 23-03: Next Inspection Date

The Asset Detail window was modified to make the **Next Inspection Date** field system generated based on a new field called **Inspection Frequency** which has been added to the Site Detail window. The **Next Inspection Date** will be system generated based on the **Last Inspection Date** plus the number of years defined in the **Inspection Frequency**. CAIS will continue to allow the user to manually update the **Next Inspection Date** after it has been system generated.

If the user opts to upload the **Last Inspection Date**, the system will automatically generate the **Next Inspection Date** based on the **Last Inspection Date** and plus the number of years defined in the **Inspection Frequency**. If the user uploads both the **Last Inspection Date** and the **Next Inspection Date**, no system generation of **Next Inspection Date** will occur.

For the **Inspection Frequency**, all sites are currently defaulted to 5 years but that can be changed at any time from the Site Detail window.

User List

The **Field Office** picklist from the User List window has been modified to include an 'All' option to further enhance the search capability.

System Documentation

The CAIS User's Guide has been updated to reflect enhancements associated with this release. This document can be obtained from the CAIS website at https://fims.doe.gov/caisinfo/doc.html.

If you have any questions related to these enhancements, please contact the FIMS/CAIS Help Desk at 202-287-1397 or via email at fims_cais_help@hq.doe.gov.
