SUBJECT: Condition Assessment Information System (CAIS) Version 3.10 Release

Today, Thursday, December 22, 2016, version 3.10 of the Condition Assessment Information System (CAIS) was released. The URL to access the CAIS application is <https://cais.doe.gov>. This release addresses the following enhancements. The Change Requests can be found on the CAIS informational website (<https://cais.doe.gov/caisinfo/cr.html>).

- Year Acquired has been added to the Ad Hoc Report tool as outlined in Change Request 16-14. In addition, the Real Property Unique ID has also been added to the Ad Hoc Report tool.
- CAIS now highlights tabs at the IU level that have data entered by adding a plus sign (+) next to the tab name as outlined in Change Request 16-17. This will make it easy to identify if Attachments or Cost Adders are in use for a particular IU record.
- The copy IU process has been modified to allow users to copy IU records to assets in all Areas within a Site.
- Next and Previous buttons have now been added to the Site Detail window.
- The FIMS Upload process has been modified so that when Modernization Cost is blank in CAIS, \$0 will be uploaded to the Modernization field in FIMS. The report produced in step 3 of the upload process will also reflect the \$0.
- The CAIS User's Guide has been updated to reflect these enhancements. This document can be obtained from the CAIS Informational website (<https://cais.doe.gov/caisinfo/doc.html>).

If you have any questions related to these enhancements, please contact the FIMS/CAIS Hotline at 301-337-6019 or email fims_cais_help@hq.doe.gov.
