Start

Is structure under a railroad track?
  - Yes
    - Is structure at grade?
      - Yes
        - Is Span Length ≥ 10 linear feet and at a depth affected by live loads?
          - Yes
            - Include as part of the infrastructure system by which the assets are maintained and managed
          - No
            - Record as an individual record in FIMS
            - Usage Code = 1468 or 1469, Bridge (Railroad)
      - No
        - Include as part of the infrastructure system by which the assets are maintained and managed
  - No
    - Is structure supported by structural members and used by pedestrians or bike traffic only?
      - Yes
        - Record as an individual record in FIMS
        - Usage Code = 1168 or 1169, Bridge (Pedestrian)
      - No
        - Does structure have a deck, superstructure, and substructure?
          - Yes
            - Record as an individual record in FIMS
            - Usage Code = 1168 or 1169, Bridge (Pedestrian)
          - No
            - Record as an individual record in FIMS
            - Usage Code = 2629, Culvert

Does structure have an Opening Area < 20 square feet?
  - Yes
    - Include as part of the infrastructure system by which the assets are maintained and managed
  - No
    - Is Span Length > 20 linear feet?
      - Yes
        - Include as part of the infrastructure system by which the assets are maintained and managed
      - No
        - Record as an individual record in FIMS
        - Usage Code = 1768 or 1769, Bridge (Vehicle)
