

A. FIMS Data Element Dictionary

Overview

The FIMS Data Element Dictionary contains definitions of all the data fields in FIMS. It also identifies the Headquarters program sponsor for each data field. As an additional aid to FIMS administrators, this dictionary identifies the data entry window that contains the data field.

Under the Window Name/Update Frequency column, the update frequency is provided. The three designations used are Static, As Needed, and Annually. Static data fields are those that are input once and basically never change. As Needed data fields are those that may require updates on a periodic basis. Data fields with a designation of Annually are those that must be updated on a yearly basis to satisfy various Departmental requirements.

The FIMS Data Element Dictionary is presented in alphabetical order by English Names which are the data field names found within the FIMS application.

English Name	Window Name/ Update Frequency	Format/ Sponsor	Definition
Area Name Required for all assets	<i>Area Level/ Property Info</i> UPDATE: Static	CHAR(35) MA	A name that is assigned by the Field Office to identify an administrative subdivision of a Site.
Area Number	<i>Area Level</i>	CHAR(3) MA Reported to FRPP	A three-digit number that identifies an administrative subdivision of a Site.
Asset % Utilized Required for all Buildings, Trailers, and OSF	<i>Utilization</i> UPDATE: Annually	NUM(3) MA Reported to FRPP	<p>That portion of an asset in use. Conduct an annual utilization survey of each asset following cognizant HQ Program Office guidance. The Asset % Utilized is independent of Status and must be reported for all FIMS Status designations. Facilities that are fully shutdown will generally have a Utilization of 0 (zero). However, because the reported Status is the predominate status, a facility that is 51 percent shutdown and 49 percent operating would be properly reported as "Shutdown" but the Asset % Utilized would be 49% (if the operating portion is fully utilized).</p> <p>Asset % Utilized is not a reflection of space assignment but rather a measure of how "full" the space is. That is how utilized the space is. As an example, if a building with four floors is fully assigned/charged to an organization but one floor is empty with the other three floors fully utilized, the Asset % Utilized would be 75%.</p> <p>For programmatic real property such as laboratories or accelerators, the Asset % Utilized may be considered to be 100% if the mission requires 100% of the facility, even though there may be times when the facility is not fully utilized, or even unutilized.</p> <p>Asset % Utilized = (Utilized Size of an asset / Total Size of an asset) X 100. Expressed as a percentage (0 to 100) in FIMS.</p>
Asset Age	System generated	NUM MA	Available in the Ad Hoc Reports - Current tool. Asset Age = Current Year – Year Built If Year Built is not populated, Asset Age will be blank.

No of Floors Required for all Buildings <u>except</u> GSA Owned and GSA Leased Trailers will default to one floor	<i>Size</i> UPDATE: Static	NUM(2) MA Reported to FRPP	The number of floors in a building including below grade floors. A floor may be defined as an internal structure designed to support personnel and/or equipment that covers at least 40% of the building footprint. Catwalks, mezzanines, lofts, mechanical vaults, and partial basements/attics are typically not counted as a floor unless they meet the stated 40% requirement. For buildings with wings/sections of varying heights, consider the footprint of the individual wing when calculating the percentage of the footprint to determine if it should be counted as a floor. For example, a building with 3 wings/sections has one 3 floor wing and two 2 floor wings. The 3 rd floor of the 3 floor wing only covers 40% of the footprint of the 3 floor wing. This would be counted as a floor for this asset because it meets the stated 40% requirement of the footprint of the 3 floor wing. This asset would have 3 floors.

Repair Needs Required for all Buildings, Trailers, and OSF	<i>O&M/Condition</i> UPDATE: Annually	NUM(10) MA Reported to FRPP	The estimated cost to restore all deficiencies identified, for a real property asset during a condition assessment survey, to a state substantially equivalent to the most recently configured capacity, efficiency, or capability as required by the mission. The "needs" originate from the real property asset, not necessarily management. Repair Needs will always equal or exceed Deferred Maintenance; the difference between the two depends on each noted deficiency's optimum period and acceptability to management. CAIS automatically recalculates Repair Needs annually. For site not using CAIS, third-party vendor and non-standard construction material estimates must be re-estimated every 5 years. In the years between the 5 year re-estimates, inflate to current year dollars for reporting.

Status Required for all Buildings, Trailers, OSF and Land	Status UPDATE: As Needed	CHAR(2) MA Reported to FRPP	Reflects programmatic intentions as well as the predominant physical/operational status of an asset based on size. The selections are as follows: 1 - Operating – A building, trailer or OSF that is in use, independent of mission need . Historical assets that are currently utilized should be reported as Operating (Status) and are typically considered 100% utilized (Asset % Utilized). Assets in use should have an Excess Indicator Flag set to "No". 2 - Standby - A building, trailer or OSF that is temporarily shut down. The asset should have an Excess Indicator Flag set to "No". The asset is in one of the following situations: 1. Undergoing modification (renovation, betterment, alteration, etc.) to meet a current need, 2. Awaiting an expected future need, or 3. Awaiting transfer to another PSO in order to accommodate a current or future need. (Note: This does not include the transfer of process-contaminated to EM for the purpose of deactivation and decommissioning.) 4. Awaiting excess screening to shutdown Historical assets that are currently not utilized and have no disposition plan should be reported as Standby (Status) with an Asset % Utilized of 0%.

			<p>3 - Outgranted - A building, trailer or OSF being used by another party through means of a lease, easement, license, or permit. Use of this Status reflects that more than 50% of the asset based on size is outgranted.</p> <p>The asset should have an Excess Indicator Flag set to "No".</p> <p>4 – Shutdown - A building, trailer or OSF that is no longer in use (and there is no potential for its use) and is awaiting Disposition regardless of when actual disposition is slated to occur.</p> <p>This Status designation is used with assets where Usage Code = 208 In-Situ Closed (buildings) or 2008 In-Situ Closed (OSF).</p> <p>Historical assets that are currently not utilized and that have a disposition plan (regardless of when it may occur), would be Excess screened and then reported as Shutdown (Status) with an Asset % Utilized of 0%.</p> <p>The process to report the building, trailer or OSF as excess to the Department's needs has been completed.</p> <p>The Excess Indicator Flag should be set to Yes in accordance with DOE's Excess Screening Procedures found on the FIMS website, https://fims.doe.gov/fimsinfo/doc.html.</p> <p>5 – Undergoing Stabilization/Deactivation – A building, trailer or OSF that is process-contaminated (contaminated from nuclear or chemical processes), is no longer in use, declared excess, and has undergone or is undergoing stabilization or deactivation.</p> <p>The asset should have an Excess Indicator Flag set to "Yes".</p> <p>Stabilization/Deactivation is an interim process where the facility is placed in a stable known condition including removal of hazardous and radioactive materials to ensure adequate protection of workers, public and environment, thereby limiting the long term surveillance, stabilization, and maintenance costs, while awaiting ultimate decommissioning. This includes facilities that are no longer needed for mission, are excess and awaiting D&D, but where systems and processes must remain operational in order to ensure safe/stable conditions and to ensure safe efficient execution of ongoing and future stabilization, deactivation, and decommissioning work.</p> <p>6 – Undergoing Decommissioning – A building, trailer or OSF that is process contaminated (contaminated from nuclear or chemical processes), is no longer in use, declared excess according to DOE's procedures, and is being actively decommissioned (i.e., being placed in its final end state which could include demolition).</p> <p>The asset should have an Excess Indicator Flag set to "Yes".</p> <p>Decommissioning The final process of closing and securing a nuclear, radiologically contaminated, or radioactive material storage facility consistent with the established end</p>

It takes place after deactivation and includes surveillance, maintenance, decontamination, and/or dismantlement or entombment. These actions are taken at the end of the life of a facility to retire it from service with adequate regard for the health and safety of workers and the public and protection of the environment. The ultimate goal of decommissioning is unrestricted release or restricted use of the site.</p> <p>7 – Undergoing Disposition - A building, trailer or OSF that is non-process contaminated (<u>not</u> contaminated from nuclear or chemical processes), is no longer in use, has been declared excess according to DOE's procedures, and is being actively disposed of (i.e., demolition, sale, etc.)</p> <p>The asset should have an Excess Indicator Flag set to "Yes".</p> <p>13 – Active – Land currently assigned a mission by DOE.</p> <p>The asset should have an Excess Indicator Flag set to "No".</p> <p>14 – Inactive – Land not currently being used but may have a future need. Includes real property in a caretaker status (closed pending disposal, for example facilities that are pending a BRAC action) and closed installations with no assigned current federal mission or function.</p> <p>The Excess Indicator Flag should be set to "Yes" in accordance with DOE's Excess Screening Procedures found on the FIMS website, https://fims.doe.gov/fimsinfo/doc.html.</p>
