Change Request #:11-08

Proposed Change:	Add **ALL** FIMS tables' fields to the "Available Columns to Display" section.
Justification:	Many, many times site personnel need the ability to quickly and easily retrieve specific FIMS data for its customers. Rather than building a lot of Microsoft Access queries to facilitate these requests, it would be a nice Ad Hoc feature to be able to select the required fields within the Ad Hoc query tool to provide a clean report for us. If the above is done I would probably phase out my using Microsoft Access for a majority of my reporting needs. Thanks! Steve
