Proposed Change:	<p>Make the Annual Actual Maintenance field available and required for Permit buildings and OSFs.</p> <p>Make Operating Cost fields available for Permit buildings and OSFs. Any asset level costs entered by the site against permitted assets would be subtracted from the site totals by the allocation routine that assigns costs to the (owned) assets. FIMS will not routinely allocate costs to these assets.</p> <p>For Permit buildings and OSFs, report the actual burdened costs of all maintenance activities (including repairs) incurred in the current fiscal year.</p>				
Justification:	<p>Currently, FIMS does not collect maintenance and operating costs for permit assets. Providing data fields to register these costs supports visibility of the cost of providing stewardship for such real property. The FRPP does not currently collect data on Permit assets.</p>
