9. National Energy Technology Laboratory																							
Justification:	<p>The data element is to identify assets that belong or are the responsibility of a national lab.</p> <p>While the majority of the time, SITE could be used as the indicator, that is not the case for all locations or programs. In some instances multiple locations support one lab. An example would be Sandia but there are others. In some cases, laboratory assets are within a site but are managed separately, i.e. SRNL.</p> <p>Having this element would be very helpful in ensuring consistency when reporting out on the national labs to the LOB, GAO, other Congressional inquiries, etc.</p> <p>Additionally, it is requested to include the full laboratory name not an abbreviation or acronym.</p>																						
Please Do Not Type Below This Line																							
FAC Remarks:	02/25/2016 – FAC Recommended. This new field will be available for all ownerships and all property types. To the extent possible, the FIMS support team will help pre-populate this field for the sites.																						
OAM Remarks:																							
FDDC Remarks:	11/3/2016 – FDDC Approved																						
Implemented:	03/02/2017 – Implemented into FIMS v2.40
