Proposed Change:	Request the RPV Model picklist in FIMS be modified to append the RPV Model code at the end of the description cost entry. (For example, E01, E02, etc).				
Justification:	Currently the RPV model is not listed in the RPV model description field making the crosswalk from the appendix time consuming. Adding the RPV model in the description field allows a FIMS user to enter the required model which will automatically bring up that entry for selection.
