Change Request #: 19-06

Requestor Name:	John Kim	Date:	06/17/2019	Affiliation:	
Email Address:	Johnkim2@lbl.gov	Phone No:	510.486.6283	DOE	
Program Office:	SC			Contractor	X
Proposed Change:	**Problem:** Overall Asset Condition information is removed/deleted when an asset status is changed to Excess (Excess Indicator is set to 'YES') in FIMS. **Proposed Change:** Please consider retaining the Overall Asset Condition value when as asset is Excessed in FIMS. The value should be displayed but not updatable for Excessed assets.				
Justification:	The change will allow a Site to avoid a needing to look up and manually enter overall asset condition for each excess asset whenever analyzing and preparing overall asset condition reports. The change will save some time and eliminate potential errors when reporting overall asset condition.				
Please Do Not Type Below This Line					
FAC Remarks:	06/26/2019 – FAC Not Recommended. The FAC suggested the historical ad-hoc query tool can be used to pull this information for those assets in Shutdown status. In addition, leaving this information visible for Shutdown assets could be confusing to others who may not be as familiar with FIMS but extract data for analysis purposes. This could lead to misinterpretation of the data.
